

Sample Academic Document

This is a sample paragraph for testing FaraPraiser. The application can parse various document formats including DOCX and PDF files. It extracts paragraphs, tables, lists, and headings for paraphrasing.

Key Features

Document parsing and analysis

Multiple paraphrase variants

Tone customization options

Research Methodology

The research methodology involves systematic analysis of text structures. Each document block is processed independently to maintain context and preserve formatting. This approach ensures accurate paraphrasing while maintaining the original document structure.

Feature	Description
LLM Support	Ollama and LM Studio
Export	DOCX and PDF
